Subprocessors

We are committed to protecting personal data and want to be transparent about the subprocessors who process data on our behalf. This page lists Vultr’s current subprocessors and where they process data.

All subprocessors operate under a Data Processing Agreement (DPA) with us, which requires them to follow the same data protection obligations we have agreed with our customers. This means they must handle personal data securely, only use it for the purposes we have authorized, implement appropriate technical and organizational measures to protect the data, and cooperate with us to respond to any requests from data controllers or data subjects. By doing so, we ensure that our subprocessors maintain the same high standards of privacy and security that our customers expect and that all processing activities remain fully compliant with GDPR requirements.

Subprocessor Name	Processing Location
-------------------	---------------------

MaxMind	Global (including EU/EEA/USA)
Kount	Global (including EU/EEA/USA)
ZoomInfo	Global (including EU/EEA/USA)
Backblaze	Global (including EU/EEA/USA)
Aiven	Global (including EU/EEA/USA)

We update this page whenever a subprocessor is added, removed, or changed. Customers will be notified of relevant changes to subprocessors that process their data, ensuring full transparency and compliance with our DPA and GDPR obligations.

Products	Features	Solutions	Resources	Company	
Cloud Compute	Regions	Industry Cloud	FAQ	Our Team	Contact Sales
Cloud GPU	Advanced Network	One-Click Deployment	Developers / APIs	News	Log in
Bare Metal	Control Panel	Use Cases	Vultr Docs	Brand Assets	
File System	Operating Systems	Marketplace	Server Status	Referral Program	Sign up
Object Storage	Upload ISO	Browse Apps	Bug Bounty	Creator Program	
Block Storage		Become a Vendor	Promotions	Careers
